

QUICK INSTALLATION
AND PROVEN RELIABILITY

The Evolution of Wireless

Building on a **legacy**

There's a simple reason why Honeywell's 5800 Series is the premier name in wireless. Reliability. Of course, it doesn't hurt that the field-proven 5800 Series is also the most flexible, convenient and cost-effective wireless security in the industry today. But don't just take our word for it—ask the thousands of dealers around the world who have used 5800 Series devices on millions of installations. They'll tell you that they make even the most labor-intensive installations quicker and more profitable, from the smallest home to the largest building and any job in between.

Today, we've evolved by taking our wireless security technology to new levels by developing exceptional new products—several of which boast a more convenient, compact design and up to a ten year battery life. By building on our legacy, we're providing you with the performance you've come to expect from the 5800 Series with even more exciting features—including double the pet immunity and triple the battery life in our newest PIR and the first real solution for protecting vinyl windows.

Wireless Transmitters

5878 Wireless Wall Transmitter

Honeywell's attractive, multi-functional 5878 Wireless Wall Transmitter can arm and disarm alarm systems, control lights or operate garage doors with a single touch.

5818MNL Recessed Transmitter

Now with Lithium

With its small, sleek, tapered design, the 5818MNL is another great example of how our technology has

evolved to meet your needs. It disappears when installed, making it perfect for discreet applications.

5820L Slimline Transmitter

Now with Lithium

At nearly one third smaller than standard transmitters, Honeywell's 5820L is the ideal choice for casement and double hung-windows.

5800Micra Mini Window Recessed Transmitter

Honeywell's patented 5800Micra Recessed Transmitter is so small, it virtually disappears when installed. With

features including up to a ten year battery life and exceptional range, you'll want to use it on every job.

5815 Door/Window Transmitter

Thanks to its low-profile, sleek look, Honeywell's 5815 is the ideal solution for installations where

small size, discretion and aesthetics are critical. It provides you with a reliable, convenient and cost-effective solution for door and window protection. Dual reed switches make installations more flexible.

EXPECT MORE.

Today's new wave of 5800 Series wireless transmitters provide you with more of what you're looking for:

- More convenient, compact size
- More installation flexibility
- More battery life
- More pet immunity

Motion Detectors

5894PI Wireless Pet Immune PIR

The 5894PI, with its long battery life up to ten years and pet immunity for animals up to 80 lbs., makes wireless more flexible for every installation while reducing service costs. It achieves optimal performance through the use of Uniform Sensitivity Optics, which provides a consistent level of detection throughout the entire coverage area—no matter what the distance. An EZ opening cover (no tools required) makes installations a snap!

5897-35 Wireless DUAL TEC® Motion Sensor

Designed for the toughest commercial environments, Honeywell's 5897-35 provides all of the advantages of robust DUAL TEC accuracy and reliability with improved false alarm immunity. The combined strength of both microwave and PIR technologies ensures superior detection. Additional features include automatic walk test mode, temperature compensation for improved performance and optional barrier and pet alley lenses for the ultimate in installation ease and flexibility.

Glassbreak Detectors

5853 Wireless Glassbreak Detector

Honeywell's 5853 offers a wireless FlexGuard® solution to protect all types of glass. Installers rely on FlexGuard as a first line of defense, because it keeps intruders where they belong...outside. You'll provide your customers with the highest level of security possible—without any labor and installation headaches or costly service calls.

5800SS1 Wireless Shock Sensor

This compact, versatile detector mounts directly on the glass surface and offers excellent protection for all glass types—including plate, tempered, laminated and wired. It provides outstanding false alarm immunity, especially in problem areas such as kitchens and bathrooms. It's ideal for hard to reach areas like skylights.

Environmental Control

5821 Temperature / Flood Sensor

Honeywell's 5821 is a versatile wireless device that can be configured to operate as either a standalone temperature sensor and/or a remote temperature sensor or flood detector. It is ideally suited for a wide range of applications including bathrooms, laundry rooms and basements.
